HIGHLIGHTS

The most recent session of the International Laser Specialists (ILS) study club was nothing short of a clinical masterclass, bringing together experts and practitioners for an engaging, case-based discussion on the application of Photobiomodulation Therapy (PBMT) in oral medicine.

The focus of the session was on managing three particularly oral conditions

1. Xerostomia
2. Ageusia
3. Herpes Labialis

PHOTOBIMODULATION THERAPY IN ORAL MEDICINE

The session was led by Dr. Ankit Srivastava, MDS in Oral Medicine and Radiology, Associate Fellow from AALT, and currently pursuing an International Research Fellowship (IRF) from AALT.

Dr. Ankit shared compelling clinical cases, each presented with detailed protocols, step-by-step treatment planning, and insightful discussions on patient outcomes. His focus on evidence-based laser therapy and its impact on patient recovery demonstrated the real-world potential of PBMT in managing such difficult conditions.

HIGHLIGHTS

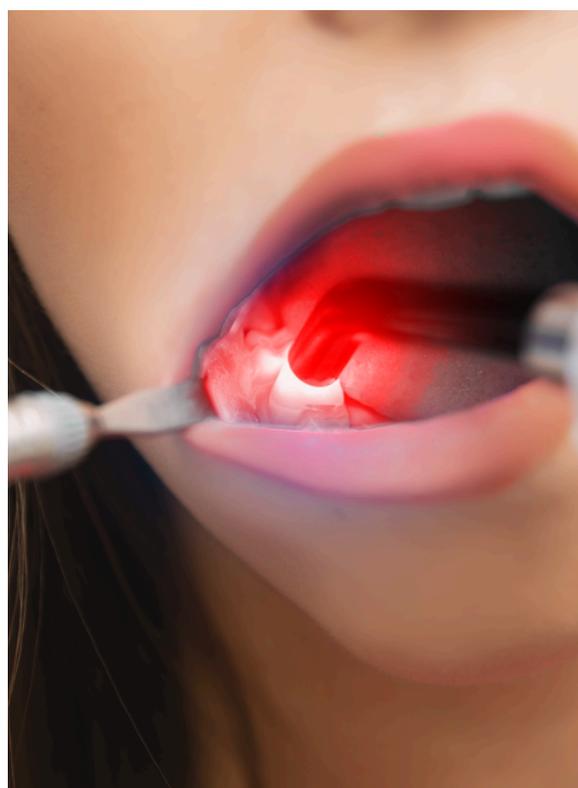

Guiding this session as moderator was Dr. Chandrashekar Yavagal, whose extensive experience and mentorship added immense value.

There was a detailed elaboration on the treatment strategies presented, including a step-by-step breakdown of each protocol and a reinforcement of the principles of safe and effective laser use.

The thorough responses to clinical queries ensured that even the most complex concepts were simplified for all participants.

By breaking down intricate procedures into understandable steps, they fostered a deeper understanding among attendees.

COLLABORATIVE LEARNING AND CLINICAL EXCELLENCE

What truly elevated this session was its interactive and inclusive nature. Clinicians actively participated, raised thoughtful questions, and shared their own clinical experiences. Every query was attentively addressed making the session deeply informative and practically enriching.

AN INTERACTIVE KNOWLEDGE EXCHANGE

This ILS gathering proved to be a grand success, embodying the spirit of collaborative learning and clinical excellence. By focusing on advanced laser applications and ensuring that clinicians left with clear, applicable knowledge, the session reaffirmed ILS's commitment to advancing safe, innovative, and impactful laser practices in healthcare.

“COMMITMENT TO ADVANCING SAFE, INNOVATIVE, AND IMPACTFUL LASER PRACTICES “

LASER STAR OF THE MONTH

Dr. Deepthi Cherian

- MDS, Periodontist and Laser Specialist
- Associate Professor, Dept. of Periodontics
- Sree Anjaneya Institute of Dental Sciences
- Consultant Periodontist & Laser Specialist

DR. DEEPTHI CHERIAN

Dr. Deepthi Cherian is a passionate dental professional with 8 years of experience, including 5 years specializing in laser dentistry.

With expertise in both general and laser dentistry, she is especially driven by the transformative role lasers play in periodontal treatments.

Inspired by Yavagal Sir, Dr. Deepthi's go-to procedures include PDT in periodontics and minor surgical interventions using the Diode 810nm laser. She envisions a future where lasers are as commonplace in dental clinics as scalers, aiming to raise awareness among general practitioners.

While she humbly believes there's still a long journey ahead to become a top specialist, she credits social media as a powerful tool in advancing her reach and knowledge.

“LET’S TAKE DENTISTRY TO NEWER HEIGHTS—LASER IS THE BEST TOOL TO START WITH” : DR. DEEPTHI
